

Country Statement

By

H.E. Mr. Ahmed Sayyad, Chargee d'affaires

Embassy of Republic of Yemen

Ladies and Gentlemen, Assalamualaikum

Initially, I would like to take this opportunity to thank the Indonesian government represented by the Honorable Minister of Foreign Affairs of Indonesia for the kind hospitality and warm reception which we felt in this country and its kind people. This is not a compliment since we have old historical ties established by our ancestors and resulted in forming a bond of kinship due to intermarriage that led to the emergence of a generation which is an ideal example of good citizenship.

Ladies and gentlemen as you all know that currently my country, the Republic of Yemen, is enduring hardships because of the war which led to severe unprecedented atrocities which affected every aspect of life of the Yemeni people; children, elderly and women.

Moreover, this conflict has transformed Yemen into a regional and international warzone. Therefore, the community of that conflict will affect the whole region and inevitably the whole world which really begins to have a negative impact on the international navigation and counter-terrorism. The prolongation of this issue will eventually lead to many consequences and repercussions like the spread of terrorism throughout the country due to famine and siege that has been encountered by the patient people of Yemen.

Accordingly, through this conference and through all of you, I urge all sides taking part in this conflict to stop fighting and to seek the path of unconditional dialogue in order to avoid further bloodshed for the sake of the Yemeni children, elderly and women.

Finally, I hope that this conference will meet all the expectations and needs of our nations, and lead our nations to peace and prosperity.
